

GE Industrial Plastics

Production Engineers

For our manufacturing facility in Cartagena, we are looking to recruit enthusiastic and result driven **Production Engineers** with passion for manufacturing and growth potential for a next manufacturing role. You will be part of a team that will play a key role in assuring proper plant performance.

Your main responsibilities are:

- Responsible for the (daily) performance of the chemical plant including achieving production, safety, quality and cost targets.
- Coordinate the execution and implementation of process improvement projects and programs to reduce cost, improve quality and the safety and integrity of our processes using Six Sigma rigor.
- Assist and serve as back up for Plant Manager, which includes call-out service.

The ideal candidate must have a BSc/MSc degree in Chemical Engineering combined with 3-4 yrs. prior process engineering experience in manufacturing environment.

We are looking for demonstrated leadership skills: being able to work, execute, influence and energize others within a global cross-functional team.

Please note that fluent English is essential.

Please send your CV to RRHH.car@ge.com, indicating the position name.

GE imagination at work

GE offers a competitive salary, outstanding benefits package and the professional advantages of an environment that supports your development and recognizes your achievements. We are an Equal Opportunity Employer.
